Audit Scope:	Full UX + SEO Audit (211 checks)	Coverage:	40% (84 / 211 reviewed)
Main Opportunity:	3 sections not yet evaluated	Urgency:	3 Critical issues

DIRECTIONAL REVIEWED SCORE

81/100

Audit Coverage: 40%

84 of 211 checks reviewed

Main Opportunity: 3 sections not yet evaluated

Grade withheld

30–59% coverage

Directional result — complete more checks

Section Scores

CATEGORY	COVERAGE	REVIEWED SCORE	CONFIDENCE
Technical SEO	100%	79 /100	High confidence
On-Page & Content	38%	83 /100	Medium-low confidence
UX Heuristics	0%	—	Not evaluated
Conversion & CTA	0%	—	Not evaluated
AI & SERP Visibility	0%	—	Not evaluated

Directional score based on 40% of the audit. Results are useful for early analysis — completing the remaining 127 checks will improve accuracy.

Executive Summary

This directional assessment covers 84 of 211 checks (40% coverage). Score: 81/100 - treat this as directional, not final. Grade is withheld until 60% coverage is reached. The biggest opportunity lies in the technical foundation, improving how search engines crawl, index, and rank the site. There are 3 critical issues that need immediate resolution.

Completing the remaining 127 checks will sharpen the accuracy of this assessment and may reveal additional issues.

Based on 40% of checkpoints reviewed (84 of 211), this is a medium-low-confidence directional result. Results are useful for planning but may shift as more checks are completed.

ESTIMATED IMPACT · if priority issues are resolved

If the priority issues are fixed, this can lead to:

- A stronger technical foundation, improving how search engines crawl, index, and rank the site — the highest-impact area in this audit
- Higher search rankings and qualified organic traffic
- Better user engagement, lower drop-off, and improved conversion signals

Addressing the high-priority issues - especially in Technical SEO - will deliver the fastest measurable improvements.

Audit Summary

Top Priority Issues

12 issues · ranked by impact

PRIORITY	ISSUE · WHY IT MATTERS · ACTION
CRITICAL Tech SEO	robots.txt file exists & is correct Search engines need clear crawling instructions to discover and process the right pages. ! Review robots.txt and ensure important pages and assets are not accidentally blocked.
CRITICAL Tech SEO	LCP <= 2.5s (Largest Contentful Paint) Slow loading directly hurts user experience and reduces search performance. ! Optimise hero images, defer unused JS, improve server response time, target LCP < 2.5s.
CRITICAL Tech SEO	HTTP -> HTTPS redirect in place Secure pages are essential for user trust, browser safety, and SEO. ! Force HTTPS redirects, fix mixed content issues, and verify SSL configuration.
HIGH Tech SEO	Site speed consistent across all templates Speed inconsistency across page templates means Core Web Vitals may pass on some pages but fail on others. ! Test multiple page templates (home, category, product, blog) with PageSpeed Insights. Identify and fix the slowest templates first.
HIGH On-Page	Meta description includes primary + secondary keyword Meta descriptions influence how compelling the search result appears to users. ! Write unique, benefit-driven meta descriptions for all key pages (140-160 characters).
HIGH On-Page	Heading hierarchy correct (H1->H2->H3) A correct heading hierarchy makes content scannable for users and interpretable for search engines and accessibility tools. ! Use one clear H1 per page, then structure sections with logical H2 and H3 headings without skipping levels. Every heading should reflect the content it introduces.

+ 6 more issues in the sections below.

Technical SEO

Full Audit Score: 79/100 Grade B · 65/65 reviewed · High confidence

Technical SEO has gaps that are restricting how search engines discover and rank the site. Fixing these builds the foundation that all other SEO efforts depend on.

Crawlability & Indexation (Items 1-14)

1	robots.txt file exists & is correct	Fail
2	XML sitemap exists & is submitted to GSC	Pass
3	Sitemap is up-to-date (< 30 days)	Pass
4	No important pages are noindex	Partial
5	Canonical tags correctly implemented	Pass
6	No orphan pages (0 internal links)	Pass
7	Crawl depth <= 3 clicks from homepage	Pass
8	Pagination handled correctly	Fail
9	No redirect chains (max 1 hop)	Pass
10	No broken internal links (404s)	Pass
11	International / hreflang tags correct	Partial
12	GSC shows no crawl anomalies	Pass
13	JavaScript not blocking key content	Pass
14	URL structure is clean and descriptive	Pass

Core Web Vitals (Items 15-26)

15	LCP <= 2.5s (Largest Contentful Paint)	Fail
16	FID / INP <= 200ms (Interaction to Next Paint)	Pass
17	CLS <= 0.1 (Cumulative Layout Shift)	Pass
18	Mobile PageSpeed score >= 70	Partial
19	Desktop PageSpeed score >= 85	Pass
20	Images use WebP / AVIF format	Pass
21	Images have width & height attributes	Pass

22	Lazy loading on below-fold images	Fail
23	Render-blocking JS/CSS minimized	Pass
24	TTFB < 800ms (Time to First Byte)	Pass
25	Font loading optimized (font-display: swap)	Partial
26	Third-party scripts deferred or async	Pass
HTTPS & Security (Items 27-34)		
27	SSL certificate valid and not expiring soon	Pass
28	All pages served over HTTPS	Pass
29	HTTP -> HTTPS redirect in place	Fail
30	www / non-www canonicalized	Pass
31	HSTS header present	Pass
32	No mixed content (HTTP resources on HTTPS pages)	Partial
33	Security headers present (CSP, X-Frame-Options)	Pass
34	No sensitive data exposed in source or URLs	Pass
Structured Data / Schema (Items 35-43)		
35	Organization schema implemented	Pass
36	WebSite schema with SearchAction	Fail
37	BreadcrumbList schema on inner pages	Pass
38	Product schema on product pages	Pass
39	Article/BlogPosting schema on blog posts	Partial
40	FAQ schema on FAQ pages	Pass
41	Review/Rating schema correct	Pass
42	No schema markup errors in GSC	Pass
43	LocalBusiness schema if applicable	Fail

Mobile & Technical UX (Items 44-52)

44	Mobile-first indexing compatible	Pass
45	Viewport meta tag correct	Pass
46	No horizontal scroll on mobile	Partial
47	Touch targets >= 48px (Google standard)	Pass
48	No intrusive interstitials on mobile	Pass
49	AMP implemented if news/article site	Pass
50	404 page is helpful and links back to site	Fail
51	Thin content pages handled (noindex or improved)	Pass
52	Duplicate content managed via canonicals	Pass

International & Advanced (Items 53-65)

53	Site language correctly declared in HTML tag	Partial
54	International targeting configured in GSC	Pass
55	CDN in use for static assets	Pass
56	Server response codes correct for all pages	Pass
57	Log file analysis shows no crawl waste	Fail
58	Internal search result pages blocked from index	Pass
59	Faceted navigation handled correctly	Pass
60	Print CSS pages not indexed	Partial
61	Session IDs or tracking params not indexed	Pass
62	Breadcrumb navigation present	Pass
63	XML sitemap excludes noindex and redirect URLs	Pass
64	Site speed consistent across all templates	Fail
65	No AI-generated content penalties (GSC traffic)	Pass

On-Page & Content

Directional Reviewed Score: 83/100 · 19/50 reviewed · Medium-low confidence · Grade withheld

On-Page SEO is well-optimised. Content is clearly structured, keyword-aligned, and formatted to drive both rankings and click-through rates.

Title Tags & Meta Data (Items 1-9)		
1	Title tag exists on every page	Pass
2	Title tag length is 50-60 characters	Partial
3	Primary keyword appears in title tag (near start)	Pass
4	Each page has a unique title tag (no duplicates)	Pass
5	Meta description exists on every key page	Pass
6	Meta description includes primary + secondary keyword	Fail
7	Meta description has a clear call-to-action	Pass
8	No duplicate meta descriptions across pages	Pass
9	Open Graph / Twitter Card tags present	Partial

Headings & Structure (Items 10-17)		
10	Every page has exactly one H1	Pass
11	H1 contains primary keyword	Pass
12	H1 differs from title tag (but aligned)	Pass
13	Heading hierarchy correct (H1->H2->H3)	Fail
14	H2s contain secondary keywords	Pass
15	Headings are descriptive (not "Section 1")	Pass
16	FAQ sections use H2/H3 for questions	Partial
17	No keyword stuffing in headings	Pass

Keyword Optimization (Items 18-26)		
REVIEWED FINDINGS		
18	Primary keyword in first 100 words	Pass
19	Keyword density natural (1-2%, no stuffing)	Pass

Not yet reviewed: 7 items — complete these checks to include them in scoring.

Content Quality (Items 27-36)

No items reviewed in this section yet.

Not yet reviewed: 10 items — complete these checks to include them in scoring.

Internal Links (Items 37-44)

No items reviewed in this section yet.

Not yet reviewed: 8 items — complete these checks to include them in scoring.

E-E-A-T Signals (Items 45-50)

No items reviewed in this section yet.

Not yet reviewed: 6 items — complete these checks to include them in scoring.

UX Heuristics was not evaluated in this audit and should be assessed in a follow-up.

Nielsen Heuristics 1-5 (Items 1-14)

No items reviewed in this section yet.

Not yet reviewed: 14 items — complete these checks to include them in scoring.

Nielsen Heuristics 6-10 (Items 15-24)

No items reviewed in this section yet.

Not yet reviewed: 10 items — complete these checks to include them in scoring.

Navigation & IA (Items 25-32)

No items reviewed in this section yet.

Not yet reviewed: 8 items — complete these checks to include them in scoring.

Accessibility (Items 33-37)

No items reviewed in this section yet.

Not yet reviewed: 5 items — complete these checks to include them in scoring.

Mobile UX (Items 38-40)

No items reviewed in this section yet.

Not yet reviewed: 3 items — complete these checks to include them in scoring.

Conversion & CTA

Not evaluated — complete this section to unlock the score

Conversion & CTA was not evaluated in this audit and should be assessed in a follow-up.

CTA Design (Items 1-8)

No items reviewed in this section yet.

Not yet reviewed: 8 items — complete these checks to include them in scoring.

Trust Signals (Items 9-16)

No items reviewed in this section yet.

Not yet reviewed: 8 items — complete these checks to include them in scoring.

Forms & Checkout (Items 17-23)

No items reviewed in this section yet.

Not yet reviewed: 7 items — complete these checks to include them in scoring.

Mobile Conversion (Items 24-28)

No items reviewed in this section yet.

Not yet reviewed: 5 items — complete these checks to include them in scoring.

Analytics & Testing (Items 29-32)

No items reviewed in this section yet.

Not yet reviewed: 4 items — complete these checks to include them in scoring.

Page-Level (Items 33-35)

No items reviewed in this section yet.

Not yet reviewed: 3 items — complete these checks to include them in scoring.

AI & SERP Visibility was not evaluated in this audit and should be assessed in a follow-up.

AI-driven search is becoming an important discovery layer across ChatGPT, Perplexity, Gemini, and Google AI experiences. This section evaluates whether the brand and content are structured in a way that can be understood, trusted, and cited by modern search and AI systems.

This is a growing opportunity area. Many competitors have not yet optimised for AI visibility, so improvements here can create a meaningful early advantage.

SERP Performance

No items reviewed in this section yet.

Not yet reviewed: 4 items — complete these checks to include them in scoring.

AEO - Answer Engine Optimization

No items reviewed in this section yet.

Not yet reviewed: 4 items — complete these checks to include them in scoring.

Google AI Overview (AIO)

No items reviewed in this section yet.

Not yet reviewed: 3 items — complete these checks to include them in scoring.

AI Visibility (GEO) ADVANCED

AI brand visibility in ChatGPT, Perplexity, Gemini & Knowledge Graph

No items reviewed in this section yet.

Not yet reviewed: 5 items — complete these checks to include them in scoring.

E-E-A-T & Authorship Signals ADVANCED

No items reviewed in this section yet.

Not yet reviewed: 5 items — complete these checks to include them in scoring.

Recommended Next Steps

A prioritised action plan based on this audit

1

Fix 3 Critical Issues

These failures have the highest impact on performance, user experience, and search visibility. Address them before anything else.

2

Strengthen Technical SEO - Score: 79/100

This is the weakest area in the audit. A focused effort here will have the highest impact on overall site health and score.

3

Work Through the Top Priority Issues

Each priority issue in this report includes a specific action step. These are your clearest, most actionable next steps.

4

Strengthen AI Visibility and Trust Signals

AI search engines (ChatGPT, Perplexity, Google AI Overviews) are becoming major traffic sources. Ensure your brand, authors, and content are optimised for this layer.

5

Complete the Remaining Audit Checks

This audit is partially complete. Finishing the remaining checks will unlock the final grade, surface additional issues, and give a reliable picture of overall site performance.

This directional report is based on a partial audit. Addressing the identified issues will deliver meaningful improvements — completing the remaining checks will sharpen the assessment.

PREPARED FOR

Sample Startup Inc.

sample-startup.io

Audit conducted: May 23, 2026

About This Audit

This UX + SEO audit was conducted for sample-startup.io on May 23, 2026. It covers 211 checkpoints across Technical SEO, On-Page Content, UX Heuristics, Conversion & CTA, and AI Visibility. Some checks require verification with external tools (Google Search Console, PageSpeed Insights, Screaming Frog, etc.). This report is a professional client deliverable - review it in the context of the site's specific goals.

How Scores Are Calculated

Scores are based only on reviewed applicable checks. Blank items are excluded entirely - they do not count as passes or failures. N/A items are excluded as they do not apply to this site. Below 30% coverage: preliminary result, grade withheld. 30-59% coverage: directional reviewed score, medium-low confidence - no letter grade is assigned at this level. 60-79%: indicative result, grade shown. 80%+: full audit score, final grade. A high score from a small number of reviewed checks does not imply the full website is strong.
